Portfolio: am-sigma-nine.vercel.app | GitHub: github.com/pavel-labs

PROFESSIONAL SUMMARY

Senior Frontend Developer with 7+ years of commercial experience building scalable web and mobile applications with React, React Native, and TypeScript. Strong background in component-driven development, modern state management (Redux Toolkit, MobX, Zustand), and reusable UI systems with Storybook. Experience as SDET with Playwright. Hands-on Node.js / Express.js experience from personal projects. Delivers features end to end in cross-functional Agile teams.

EXPERIENCE

Senior Frontend Developer Oct 2026 - Present
GB2B - GamingB2B *Warsaw, Poland*

- Developing iGaming platform apps using React (Web) and React Native (iOS, Android).

Software Developer - React / React Native Jun 2021 - Jul 2026
*Solbeg_* *Warsaw, Poland*

React and React Native applications across multiple client projects; also SDET work on Playwright automation.

- Built and maintained scalable web and mobile apps with React, React Native (Expo SDK), and TypeScript; reusable, well-typed components following a component-driven approach.
- Collaborated with cross-functional distributed teams (backend, design, QA, PM): code reviews, Agile ceremonies, frontend estimation, async communication workflows.
- Proposed and introduced code review guidelines and best practices adopted team-wide.
- Worked as SDET: designed and maintained automated end-to-end testing infrastructure with Playwright, improving regression coverage and release confidence.

Horse Racing Betting App - Cross-Platform (React Native)

- Drove architectural decisions and built a React Native application from scratch; independently designed and implemented a scalable UI Kit supporting white-label configurations and dark/light themes with a focus on maintainability, reusability, and performance optimization.
- Applied Component-Driven Development using Storybook to develop and maintain reusable components; collaborated on cross-platform delivery (iOS, Android, Web via Expo).
- Improved performance and unit test coverage for a maintainable, reliable codebase.

Betting Services Admin Panel - Web (React)

- Developed and maintained a web-based admin panel for managing betting services.
- Implemented new features, resolved issues, and adapted existing components for an upcoming UI redesign.
- Collaborated closely with backend and QA teams in an Agile workflow.

Horse Racing Betting App - Cordova (iOS) & Web (React) | SDET

- Developed and maintained React-based UI components for a cross-platform horse racing betting application targeting Web and iOS via Cordova, supporting 3+ white-label brands.
- Integrated and configured Cordova plugins, including iOS-specific functionality and platform integrations.
- Rebuilt Playwright E2E test automation from scratch to cover critical betting and user flows, supporting regression testing and release confidence.

Insurance Agent Portal - Web (React, Micro Frontends)

- Developed reusable React components and feature modules within a micro-frontend architecture.
- Integrated REST APIs and implemented application state management using Redux.
- Improved application stability and maintainability through unit and integration testing.
- Collaborated with cross-functional teams to deliver features in an Agile environment.

Transport & Logistics App - React Native

- Developed reusable UI components for two React Native applications used by logistics managers and drivers.
- Improved stability by resolving defects and supporting release quality across both apps.
- Used Azure DevOps for day-to-day development: task tracking, repositories, and pull request reviews.

Frontend Developer - React Apr 2020 - Dec 2021 (part-time)
Freelance / Self-Initiated *Remote*

React app built around the Google Maps API in collaboration with backend developers, designers, and stakeholders; also a static Next.js site as a sub-project.

- Cooperated closely with backend developers to define API contracts and integrate REST endpoints.
- Integrated cryptocurrency transactions into the application, connecting the payment flows in the UI to backend services.
- Worked independently on feature delivery, API integration, and responsive UI.

Frontend Developer Sep 2019 - Jun 2021
IterTech Innovations *Minsk, Belarus*

ERP solution for a large enterprise client; migrated class-based components to hooks and functional components. Also contributed to a Next.js sub-project.

- Built reusable UI components and maintained Storybook-based UI systems.
- Wrote unit tests with Jest and Enzyme to keep the codebase stable and regression-free.
- Worked on performance and scalability: bundle size, rendering, and asset optimization.

PERSONAL INITIATIVES

Mentara - AI-Powered Mock Interview App (iOS, Android, Web) - *In Progress*

- Full-stack AI interview-training app (Expo/React Native + Fastify), 3 orchestrated LLM agents
- Real-time token streaming over WebSocket for live interview conversations; adding voice input (speech-to-text) and voice output (text-to-speech) for a hands-free mode using Web/Native APIs
- Type-safe shared contract (TypeScript + Zod) across REST/WS
- CI/CD (GitHub Actions), EAS cloud builds, Storybook component workflow

Stack: TypeScript, React Native, Expo, Fastify, PostgreSQL, WebSockets, AI APIs, Zod, Zustand, TanStack Query, Turborepo, GitHub Actions, Clerk (Auth SDK), Stripe, RevenueCat

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries: React, React Native (Expo SDK), Next.js (SSR/SSG/ISR), Node.js, Apache Cordova
State & Data: Redux Toolkit, MobX, Zustand, TanStack React Query, Apollo GraphQL, REST, WebSockets, React Hook Form, Formik, Zod
UI & Styling: Material UI, Fluent UI, Tailwind CSS, SCSS, CSS Modules, Styled-Components, Storybook
Testing: Jest, React Testing Library, Playwright, Vitest
Build & Tooling: Vite, Webpack, Babel, ESLint, Prettier, Monorepo (Turborepo, Nx), Docker, Firebase, Postman, Swagger, CI/CD (GitHub Actions, CircleCI, Bitbucket), Azure DevOps, GCP, Git
CMS: WordPress, Contentful
AI Dev Tools: Claude Code, GitHub Copilot, Codex
Practices: Component-Driven Development, Feature-Sliced Design, Micro-frontends, MVVM, MVC, Design Patterns, Performance Optimization, Responsive Design, Agile/Scrum

EDUCATION

Bachelor of Engineering in Software Engineering Jul 2020
ISEI BSU *Minsk, Belarus*

CERTIFICATIONS

React / Angular / TypeScript / JavaScript - IT Academy, Minsk (2018-2019)

LANGUAGES

Russian: Native English: B2
